

NPFVOA Vessel Safety Program
A Leader in Maritime Safety Since 1985

What Employers Need to Know About DOT Drug and Alcohol Testing Regulations

Monday, March 2, 2009

NPFVOA Offices

10 am – Noon

FEATURED SPEAKER

Ken George has been assisting companies of all sizes with hands-on implementation and management of drug and alcohol programs since 1988. During the past twelve years, he successfully worked with companies to reduce levels of employee illegal drug use that were as high as 70% - 80%. He has been implementing and managing regulated (Department of Transportation) and non-regulated drug and alcohol testing programs since 1988, and presently manages programs under DOT, USCG, Federal Aviation Association (FAA), Federal Highway Association (FHA), and the Research and Special Programs Association (RSPA). Almost every program created and managed by Ken George Associates exceeds and surpasses the elements set forth by the US Department of Transportation in their drug-free workplace regulations.

At this seminar, Ken will highlight the auditing process and what to do if you are to be audited by the USCG.

SCOPE OF SEMINAR

- What Employers need to know about DOT drug and alcohol testing regulations
- Requirements for compliance
- Guidance and Best Practices
- Types of required testing
- Your responsibilities as an employer
- Interpreting results
- Record keeping requirements
- Audit preparation
- Common areas of non-compliance
